

Dear VMW Family,

We know this past week has been a whirlwind for all of us. We want you all to know how much we appreciate the level of professionalism & calmness you all have demonstrated, in a time when it was needed most. Clients come to VMW because we are a step above the rest.

“Vinings Massage & Wellness is a community of practice. Practicing presence, compassion and mindfulness, we support the physical, emotional and spiritual wellness of our employees, clients and community.” – VMW Mission Statement

We are living in a time that requires us to stay true to our mission; to emit compassion, to remain mindful and grounded, and to support those around us. This includes our families, co-workers, and clients, many of which have woven massage into their wellness routines and who come to us so they can be their best selves.

As of 3/14/20 VMW remains open. In order for us to responsibly provide our services to the community we must take additional measure to keep our clients and employees safe. We are implementing procedures based on CDC guidelines, which can be found on the VMW Employee COVID website.

We ask that all employees visit www.viningsmassage.com/COVID and enter password VMWCOVID and read all materials.

The safety of our employees, their families and our clients are of the utmost importance to us. Per CDC guidelines

- Employees who have symptoms of acute respiratory illness and/or a fever (100.4° F [37.8° C] or greater using an oral thermometer), signs of a fever, and any other cold or flu like symptoms shall contact Cara and not come to work.
- Employees who believe to have been exposed to COVID-19 will contact Cara and not come to work.
- Employees who self-select to remain home and not come to work should also contact Cara and we ask for a 24-hour notice if clients are on your books.

We are fortunate to have an owner who also works for the second largest healthcare provider in the county. Our decision to remain open with additional measures in place has been informed by CDC guidelines and best practices being implemented by healthcare providers. However, we realize this is a rapidly evolving situation and will make changes and provided updates as required.

Sincerely,
Cara & Patrick Thurman
